

# Albany 2022 Librarian Geospatial Workshop

April 28, 2022

## Q2 - I am a

Answer	%	Count
Public Librarian	12.50%	1
College Librarian (please enter the name of your college below)	12.50%	1
Other	75.00%	6
Total	100%	8

Other - Text
Special Librarian At CDLC
retired public librarian
retired research librarian
Library Assistant at a Public Library
Historical Society Archivist
Museum archivist

**Q3 - For the statements below, choose how you felt about the virtual workshop.**

Question	Strongly Disagree		Disagree		Neutral		Agree		Strongly Agree		Total
I enjoyed this workshop.									100.00%	9	9
I learned a lot from this workshop.							33.33%	3	66.67%	6	9
The presentations were well organized.							11.11%	1	88.89%	8	9
The information was easy to understand.					11.11%	1	33.33%	3	55.56%	5	9
The hands-on lab activities were clear and well planned.							33.33%	3	66.67%	6	9
This workshop increased my awareness of the GIST field and its applications.							11.11%	1	88.89%	8	9
This workshop increased my understanding of MCC's current and future GIST programs.							22.22%	2	77.78%	7	9
I am interested in supporting MCC students and helping them find GIS data.					33.33%	3	33.33%	3	33.33%	3	9
I would recommend this workshop to other librarians.					11.11%	1	11.11%	1	77.78%	7	9

**Q4 - What did you like most about the workshop?**

I just really enjoy data and maps so this was a great way to learn how to merge the two.
I enjoyed learning about GIST. It was good being exposed to an approach which was new to me.
Helped bring me up to date with using GIS data -- access, options.
I enjoyed learning about the living atlas and other arc gis online features.
Jon's presentation was interesting, clear and organized. He provided a great introductory lesson to geospatial data, and a few of the tools used to create maps and storymaps.
variety of applications of tech covered
This was all new to me. The information was easy to access.
Opportunity to use the ArcGIS, examples of StoryMaps
learning new stuff

### Q5 - How could this workshop be improved?

I think it would have been a little better to bring some info in with us. So like the Story Map was neat but it took too long to look for images to use. It would have been better to have some image files to use and maybe a few .csv data files. They could live in a shared drive we could share ahead of time.
I felt like the purpose of the workshop was not clearly stated and would have liked a better understanding of what was being asked of me prior to the workshop.
I wished I had reviewed some concepts and terminology before I came. Maybe a checklist of broad subjects that are to be covered could go with the event announcements?
I've had a little prior experience with StoryMaps, so I got deeply into creating one in this workshop. It's difficult with the hands-on portion of a workshop to help people at varying levels of skill and comfort with technology and tools. I'd love to participate in a longer, more in-depth workshop.
Maybe give parameters for story map beforehand so folks can brainstorm and come in with ideas.
Keep it as it is. I enjoyed the introduction.
More examples of StoryMaps or other programs in libraries or classrooms (e.g. outreach, education, local history), example or opportunity to use an open source software option

### Q6 - If you are interested in supporting MCC GIST students, please provide us with your name and email so we can follow up with you.
