

**GETTING
STARTED WITH
YOUR ATE
EVALUATION**

WESTERN MICHIGAN UNIVERSITY
The Evaluation Center

GETTING STARTED WITH YOUR ATE EVALUATION

EVALUATION BASICS

- Ask important questions about the project's processes and outcomes
- Gather evidence that will help answer those questions
- Interpret findings and answer the evaluation questions
- Use the information for accountability, improvement, and planning
- Continue this process throughout the life of your project

Resource:
Data Collection Planning Matrix (bit.ly/data-matrix)

USING EVALUATION

- Improve your project
- Inform stakeholders
- Fulfill grant requirements (annual report)

Resource:
Expectations to Change (E2C) (bit.ly/Adams-E2C)

WORKING WITH YOUR EVALUATOR

- Make sure your evaluator's contract is in place
- Assign a point person on your project team for evaluation matters
- Schedule a recurring meeting with your evaluator
- Make an appointment with your college's data person
- Set up a timeline for your evaluation
- Commit to using your evaluation results

Resources:
Principal Investigator "To Do" Checklist: Before Launching Your Project Evaluation (bit.ly/75DoChecklist)
Communication Plan Checklist for ATE Principal Investigators and Evaluators (bit.ly/checklist-communication)

See evaluation come to life

Our webinars showcase practical examples and demonstrations that demystify the evaluation process. These live, interactive learning events feature the expertise of experienced evaluators and successful project leaders. Information-rich handouts summarize key points and include links to learn more.

Use data for ATE research, development, and evaluation

The annual survey of ATE grantees has generated almost 20 years' worth of data about ATE project and center activities and achievements and the students and faculty served through ATE programming. You can use the results to learn about the program and for your own research, proposal development, and evaluation purposes.

Improve your evaluation work now

Our resource library houses an array of checklists, templates, guides, and other resources to help you improve your evaluation work immediately. Tools such as the ATE evaluation planning checklist, logic model template, and data collection planning worksheet help shorten the evaluation learning curve.

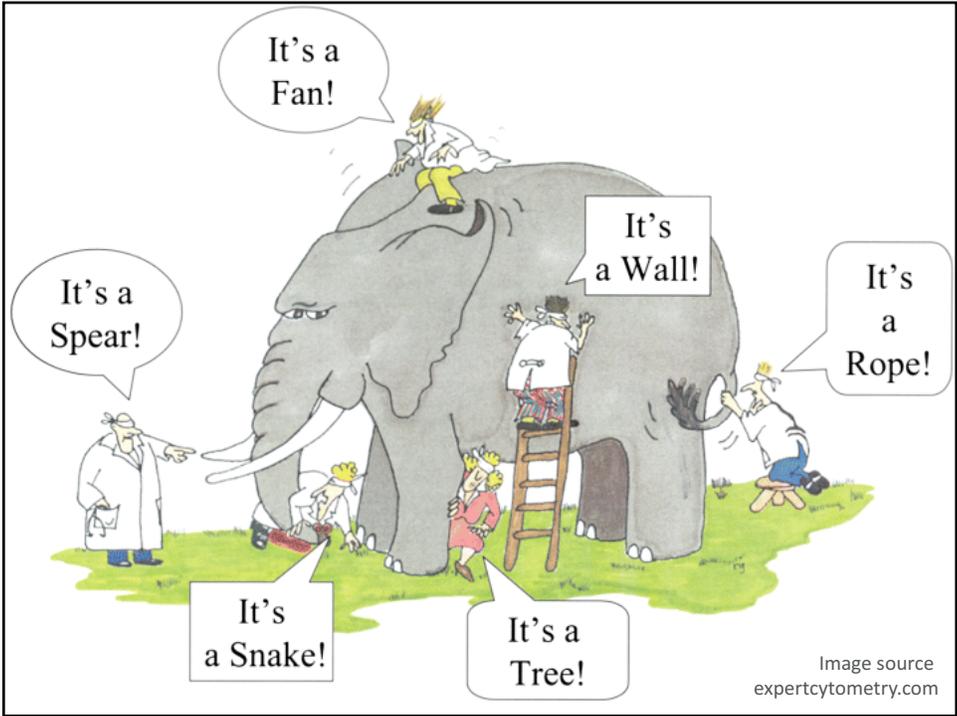

Learn from your peers

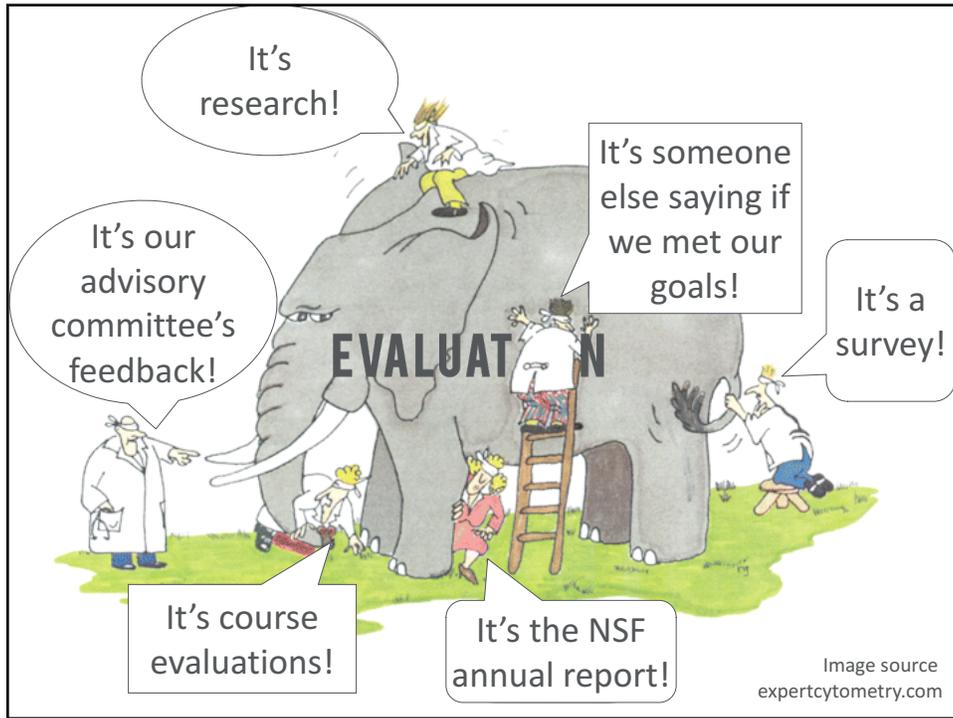

The EvaluATE-curated blog features the wisdom, experiences, and perspectives of a wide range of ATE community members, including project leaders, evaluators, researchers, and grants specialists. Blog authors share their real-world examples and lessons learned so that you can benefit from their evaluation experience and get ideas for your own practice.

NSF
EvaluATE is the evaluation support center for the National Science Foundation's Advanced Technological Education (ATE) program. We are supported by NSF under grant number 1600992.

1 EVALUATION BASICS

EVALUATION

A systematic determination of a project's quality and effectiveness.

WHAT DOES IT MEAN?

2017
200 Graduates

WHAT DOES IT MEAN?

2017
200 Graduates

VS

2016
100 Graduates

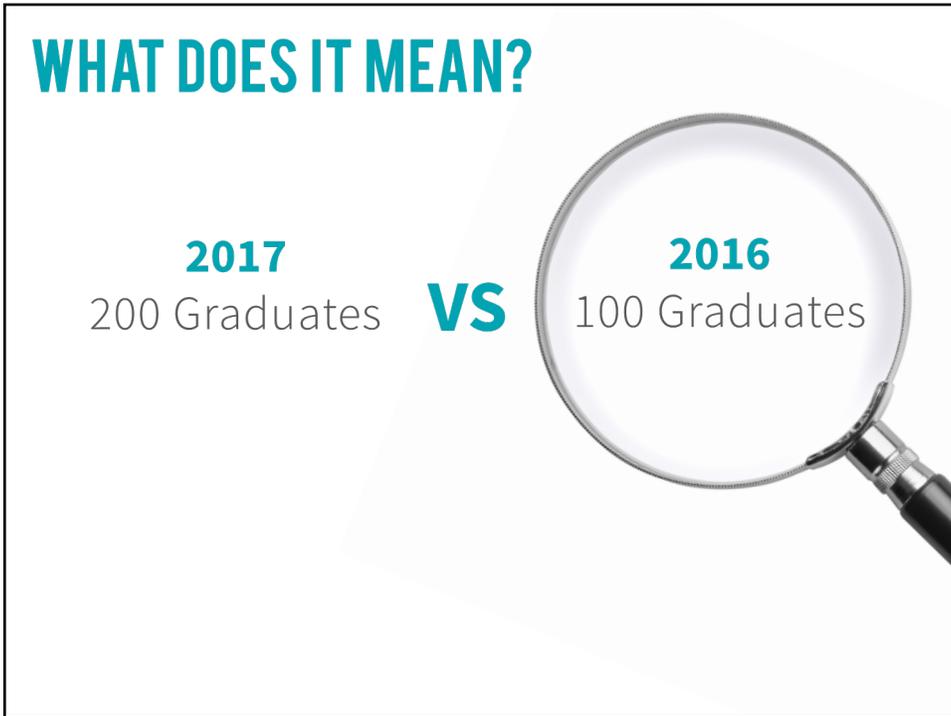

The image shows a comparison between two years. On the left, the year 2017 is associated with 200 graduates, accompanied by a thumbs-up gesture. On the right, the year 2016 is associated with 100 graduates, with a magnifying glass highlighting the text. The background features a faint, light blue geometric shape.

WHAT DOES IT MEAN?

2017
200 Graduates

VS

2016
100 Graduates

This image is identical to the one above, showing a comparison between 2017 (200 graduates) and 2016 (100 graduates). In this version, the magnifying glass is positioned over the 2016 data, and there is no thumbs-up gesture.

1. ASK IMPORTANT QUESTIONS about a project's processes and outcomes.

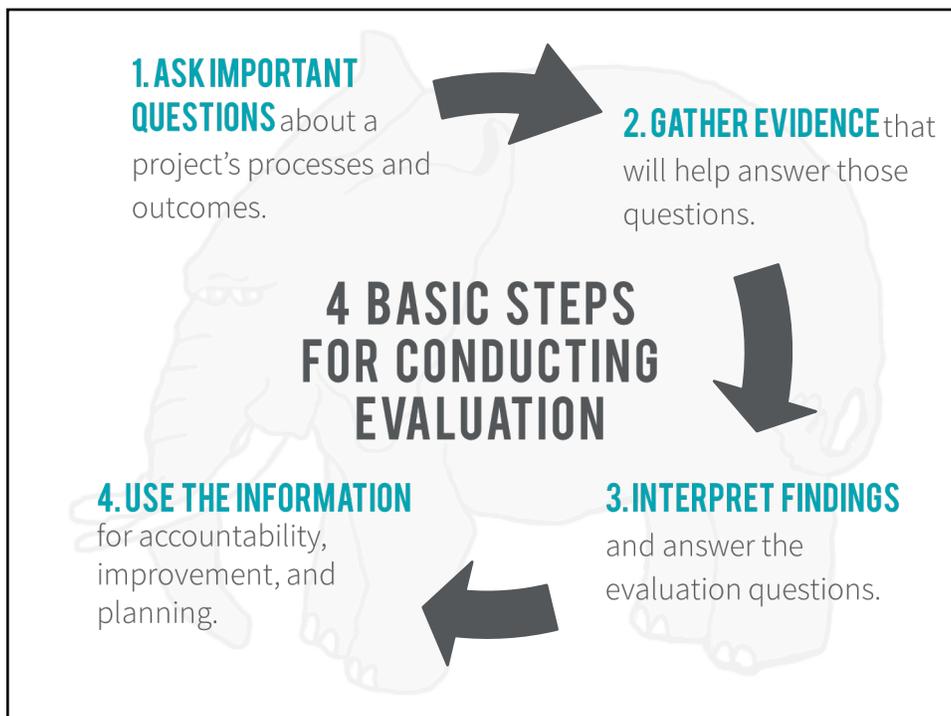

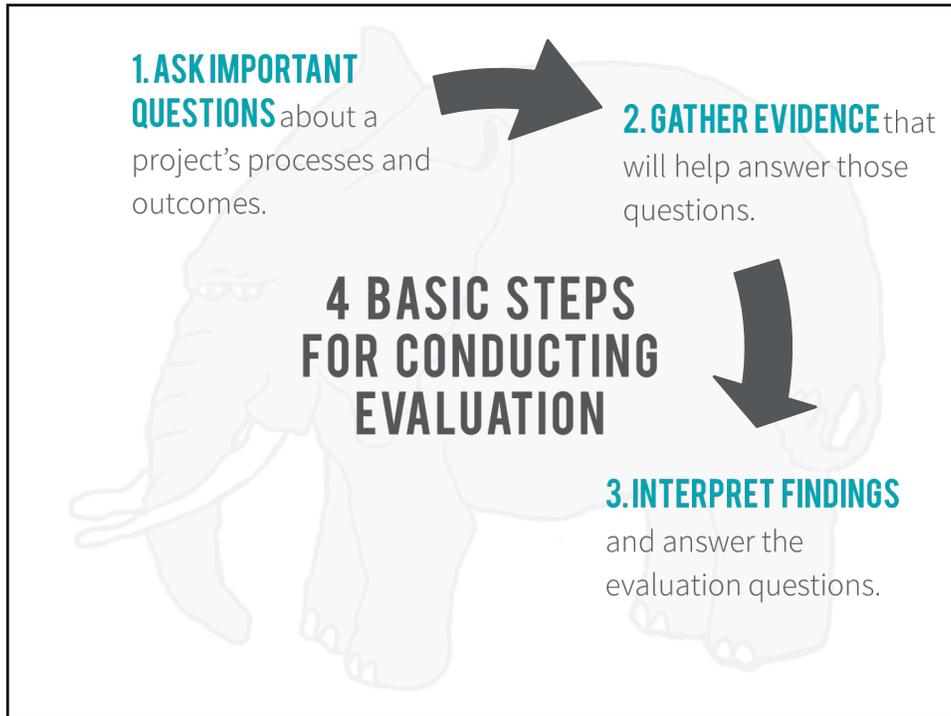

4 BASIC STEPS FOR CONDUCTING EVALUATION

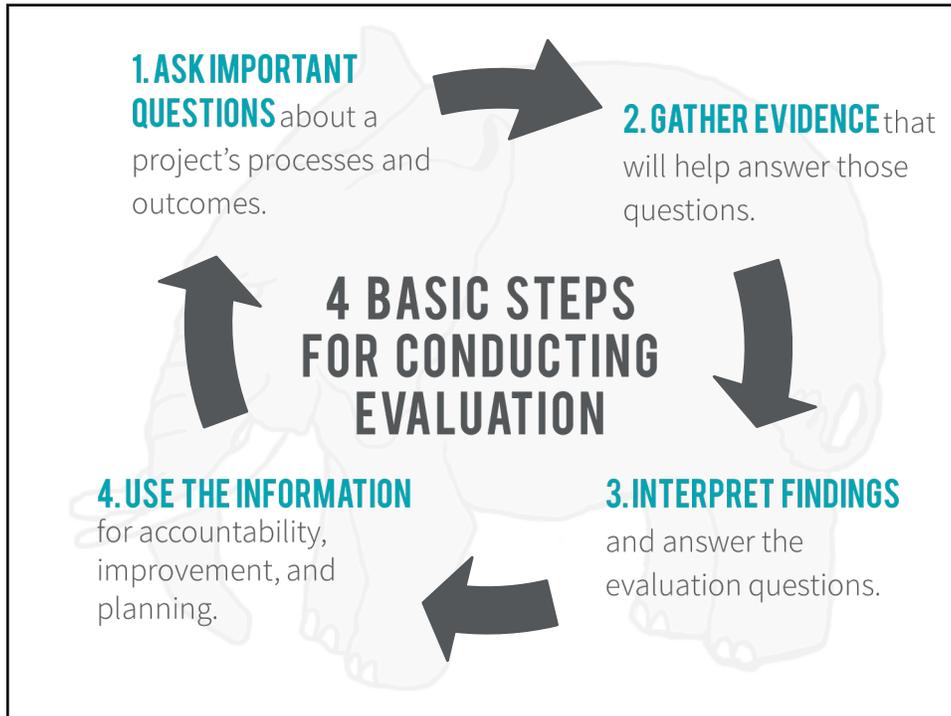

1. ASK IMPORTANT QUESTIONS about a project's processes and outcomes.

2. GATHER EVIDENCE that will help answer those questions.

4 BASIC STEPS FOR CONDUCTING EVALUATION

ACCOUNTABILITY

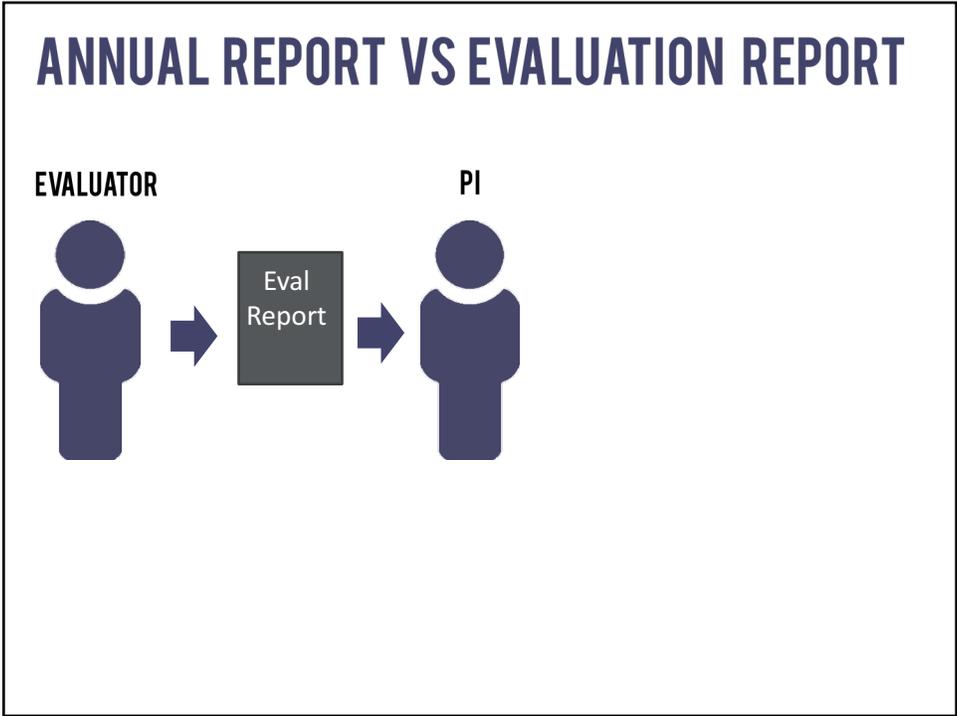

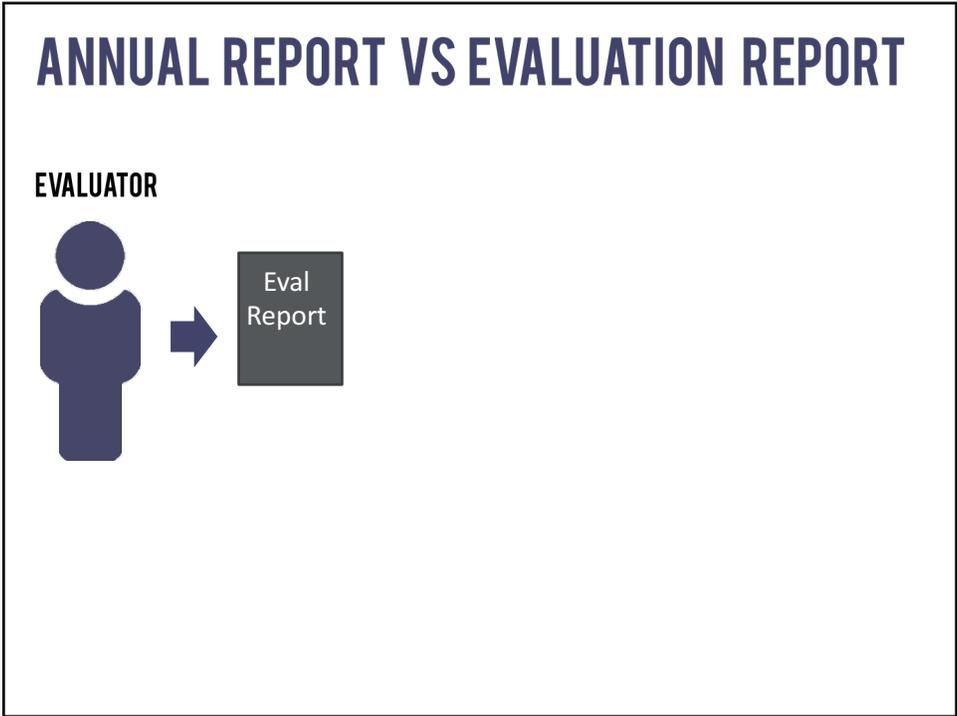

A stylized icon of a circuit board with five components. Each component consists of a small circle at the bottom connected to a vertical line, which then branches into three horizontal lines of varying lengths, resembling a microchip or a component on a PCB.

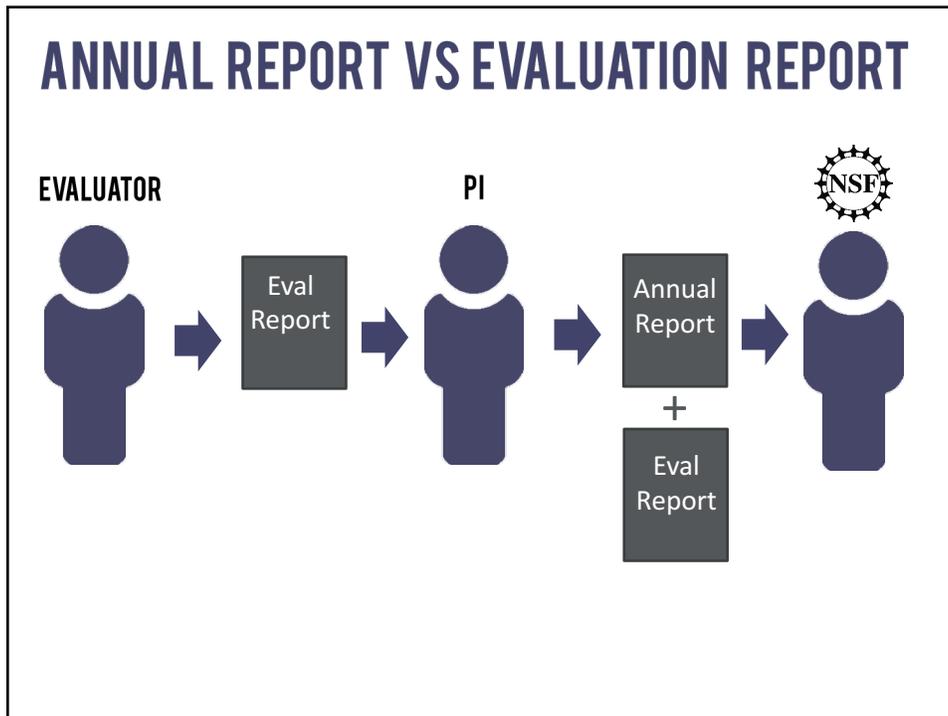

IMPROVEMENT

A simple icon of a rocket ship, angled upwards and to the right, with a small circle representing a window or sensor on its side.

“The most important purpose of evaluation is not to prove, **but to improve.**”
— Daniel Stufflebeam

2 USING EVALUATION

HOW TO USE EVALUATION RESULTS?

- Feedback to project staff and stakeholders
- Annual report to NSF
- Annual ATE survey
- New proposals

FEEDBACK TO PROJECT STAFF AND STAKEHOLDERS

EvaluATE Communication Plan Checklist
for ATE Principal Investigators and Evaluators

Lyssa W. Becho and Lori A. Wingate | October 2017

Creating a clear communication plan at the beginning of an evaluation can help project personnel and evaluators avoid confusion, misunderstandings, or uncertainty. The communication plan should be an agreement between the project's principal investigator and the evaluator, and followed by members of their respective teams. This checklist highlights the decisions that need to be made when developing a clear communication plan.

- Designate one primary contact person from the project staff and one from the evaluation team.** Clearly identify who should be contacted regarding questions, changes, or general updates about the evaluation. The project staff person should be someone who has authority to make decisions or approve small changes that might occur during the evaluation, such as the principal investigator or project manager.
- Set up recurring meetings to discuss evaluation matters.** Decide on the meeting frequency and platform for the project staff and evaluation team to discuss updates on the evaluation. These regular meetings should occur throughout the life of a project.
 - Frequency** — At minimum, plan to meet monthly. Increase the frequency as needed to maintain momentum and meet key deadlines.
 - Platform** — Real-time interaction via phone calls, web meetings, or in-person meetings will help ensure those involved give adequate attention to the matters being discussed. Do not rely on email or other asynchronous communication platforms.
 - Agenda** — Tailor the agendas to reflect the aspects of the evaluation that need attention. In general, the evaluator should provide a status update, identify challenges, and explain what the project staff can do to facilitate the evaluation. The project staff should share important changes or challenges in the project, such as delays in timelines or project staff turnover. Conversations should close with clear action items and deadlines.
- Agree on a process for reviewing and finalizing data collection instruments and procedures, and evaluation reports.** Determine the project staff's role in providing input on instruments (such as questionnaires or interview protocols), the mechanisms by which data will be collected, and reports. Establish a turnaround time for feedback, to avoid delays in implementing the evaluation.
- Clarify who is responsible for disseminating reports.** As a rule of thumb, responsibility and authority for the distribution of evaluation report lies with the project's principal investigator. Make it clear whether the evaluator may use the reports for their own purposes and under what conditions.

Communication Checklist

Evaluation 101

Principal Investigator "To-Do" Checklist: Before Launching Your Project Evaluation

What to Do	To/With Whom
Announce or discuss NSF grant award.	Evaluator, partners and advisors/advisory groups Colleagues at your institution <ul style="list-style-type: none"> • SRO/grant writer & Data person • Fellow faculty • PI/Marketing Dept. • Business & Purchasing Offices The public- with attribution to NSF!
Process contracts.	Evaluator Partners (include providing data as contract obligation)
Discuss evaluation expectations, processes, activities, and timeline (note IRB considerations).	Evaluator
Review goals/objectives and identify data capture needed (and by whom) for the evaluation.	Evaluator
Determine data definitions, time frames for data capture (e.g., by semester), reporting frequency/dates for project. Don't forget to include current status or recent history for baseline data. Review data management plan.	Data Person
Communicate data needs/timelines/reporting dates to partners from whom you will need data.	Co-PIs, partner institutions/organizations
Review/set goals for success if not specific in proposal (actual numbers, not just %) with interim benchmarks for gauging progress.	Evaluator, Co-PIs, partners
Plan evaluation activities and discuss evaluation tools to be used. Use uniform tools (e.g., surveys) across partnership and include the capture of demographic data and other information that will be needed for the ATE Annual Survey (if not specifically for your project).	Evaluator, Co-PIs
Discuss evaluation reports to be provided and reporting dates (align deadlines to your reporting needs: NSF annual report, advisory meeting, etc.).	Evaluator
