Mobile App Design and Development

Mobilize your career as an app designer or developer

In the last decade, the percentage of Americans who own a smartphone [jumped from 35 to 85 percent](#). The mobile industry has created a wide range of career opportunities — companies need tech professionals who can build engaging, easy-to-use mobile apps. Columbus State's two new Mobile App associate degree programs offer the opportunity to launch a career in this growing field.

Career Opportunities

Technology needs span all sectors and industries, meaning tech-savvy professionals are in increasingly high demand. In fact, Columbus has become a [major tech hub](#), attracting new startups and tech companies every year.

Cutting-Edge Degree Programs

The Mobile App majors prepare students with highly specialized, in-demand skills in the design and development of content and media for iOS and Android mobile devices. Equipped with quality education and experience, our program graduates will be versatile, competitive job candidates.

Mobile App Design AAS

As a design student, you'll focus on the look and feel of mobile apps as you:

- Design user interfaces and user experience (UI/UX)
- Learn about Rapid Prototyping software: Adobe XD (Figma, Sketch, Photoshop)
- Develop project management skills using Agile Methodology in mobile apps

View the [Mobile App Design plan of study](#).

Mobile App Development AAS

As a development student, learn how to get the mobile app designs up and running.

- Investigate Android development using Java and projects directed at Android platform
- Investigate iOS development using Swift and projects directed at iOS platform

[VISIT](#)[GIVE](#)

Collaborative Experiences for Both Programs

Design and Development students come together for a capstone course in Columbus State's new Mobile Device Lab. Mimicking industry work environments, students from both programs collaborate to create and launch a mobile app, lending them a jump-start in the job market.

Students from both programs will have the opportunity to:

- Design interfaces using iOS/Android guidelines
- Gain real-world knowledge about React Native and hybrid app development
- Learn using mobile analytics with data-driven and research-focused mentality
- Participate in a collaborative capstone project to create and launch a mobile app

This pair of programs was born from a cross-departmental collaboration. Professor Jon Lundquist ([Interactive Media](#)) teamed up with Associate Professor Peter Carswell ([Information Systems Technology](#)) to conceptualize and implement degree programs for Mobile App Design and Mobile App Development.

Ready to get started? Incoming and current students can contact [Student Central](#) for help declaring or changing a major.

The Columbus State Experience

Columbus State provides an affordable, streamlined path to achieving your career goals. You'll get a high-quality education without going into great debt — 76% of our students take on zero student loan debt. And we offer the flexibility you need. We built our offerings to be highly customizable and [stackable](#) for all ages and stages. Our [advisors](#) help tailor your roadmap, whether you plan to continue to another college after ours or start working right away.

Two NEW Associate of Applied Science Degree Pathways!

Mobile App Design AAS

Division/School: Business and Engineering Technologies

Department: Art, Media, & Design

The **Mobile App Design** degree is designed for students who wish to pursue a career as an application designer. The program equips Interactive Media students with highly specialized and in-demand skills in the design and development of content and media for mobile devices in iOS and Android. Design principles, user interface and user experience considerations for a multitude of screens are emphasized. Technical topics include markup or scripting languages that are required of specific media, as well as media optimization, distribution methods, mobile analytics, basic networking concepts, database fundamentals and project management skills.

Mobile App Design AAS

Program Objectives

Upon successful completion of the **Mobile App Design** program, students will be able to:

- Design and develop mobile media content incorporate design, usability, and interaction principles, specific to mobile device use.
- Identify strategies and technologies for marketing, selling, and distributing products and services through the mobile arena.
- Identify opportunities, challenges, and emerging technologies in the mobile industry.

Mobile App Design AAS

Career Options

Mobile app designers can go by many names, including app designers, iOS designers, Android designers, and more. They usually work closely with user experience (UX) designers and user interface (UI) designers to apply their designs to mobile interfaces. Their main focus is on native mobile applications, but they also must be able to create designs for mobile and hybrid apps.

With this degree, graduates will be qualified to fill one of these careers:

- Mobile Applications Designer
- Interactive Web Design
- Experience Designer
- Social Media Specialist
- Digital Media Producer
- Mobile Design Technician
- Visual Interface Designer

Mobile App Development AAS

Division/School: Business and Engineering Technologies

Department: Information Systems Technology

The **Mobile App Development** degree is designed for students who wish to pursue a career as an application developer for mobile devices such as smartphones or tablets. The Information Systems Technology program features the two popular platforms of Android and iOS programming environments. The curriculum also includes a curriculum in current design principles, user-interface design, and user experience and analytics. The degrees have multiple shared courses, including the capstone, which will be held in the new state-of-the-art mobile lab.

Mobile App Development AAS

Program Objectives

Upon successful completion of the **Mobile App Development** program, students will be able to:

- Develop applications for mobile devices on both iOS and Android platforms.
- Apply concepts of HTML 5 and JavaScript to network applications.
- Apply modern project management techniques using an Agile methodology

Mobile App Development AAS

Career Options

Mobile application and front-end developer positions are not new, even so, this is an emerging field with broad technical knowledge needed.

With this degree graduates will be qualified to fill one of these careers:

- Mobile Applications Developer
- Interactive Web Developer
- iOS or Android App Developer
