ATEEC DACUMS

SPILL RESPONSE/ENVIRONMENTAL CLEANUP TECHNICIAN

July 18 & 19, 1995

The Spill Response/Environmental Cleanup Technician prepares for, responds to, and mediates spills and wastes to ensure public safety, environmental protection, and regulatory compliance.

General Areas of Competence (In Bold) and Specific Tasks

• Category A. Ensuring Regulatory Compliance

- A-1 Identify applicable regulations
- A-2 Review applicable regulations
- A-3 Interpret regulations
- A-4 Apply regulations to your work
- A-5 Maintain documentation

• Category B. Operating and Maintaining Equipment

- B-1 Perform preventative maintenance
- B-2 Safely operate equipment within its limitations
- B-3 Assemble, disassemble, or reassemble equipment components
- B-4 Troubleshoot equipment
- B-5 Perform minor repairs
- B-6 Test and evaluate equipment
- B-7 Maintain documentation

• Category C. Training

- C-1 Assist in development of training materials
- C-2 Provide classroom and field training
- C-3 Conduct presentations
- C-4 Assist in writing operations manual(s)
- C-5 Maintain mandatory refresher training
- C-6 Evaluate effectiveness of training

Category D. Conducting Initial Site Assessment

- D-1 Ensure personnel safety
- D-2 Perform a personnel headcount
- D-3 Establish communications with appropriate parties, including spiller, if possible
- D-4 Ensure that spill notifications are made
- D-5 Estimate severity of spill: estimate area impacted and its environmental sensitivity; estimate volume spilled/released; determine the product spilled/released
- D-6 Determine environmental/weather conditions: monitor weather; monitor air and water quality; monitor wildlife
- D-7 Conduct hazard assessment, including establishment of the exclusion zone
- D-8 Review Material Safety Data Sheet(MSDS) to determine associated hazards
- D-9 Determine appropriate personal protective equipment (PPE) based on MSDS
- D-10 Establish site safety plan
- D-11 Set initial objectives
- D-12 Determine equipment and personnel needs

C-7 Main

- D-13 Follow/complete pre-entry plan
- D-14 Complete reports/forms
- D-15 Maintain documentation

• Category E. Controlling Sources

- E-1 Identify and review control options
- E-2 Set up decontamination area (May need to be set up prior to site assessment)
- E-3 Select and execute control option(s)
- E-4 Evaluate effectiveness of control option(s)
- E-5 Maintain documentation

Category F. Controlling/Containing Spill

- F-1 Consider contingency plan and determine course of action to minimize impact of spill
- F-2 Identify and evaluate containment options
- F-3 Select and execute containment option(s)
- F-4 Evaluate effectiveness of containment options
- F-5 Maintain documentation

• Category G. Recovering/Removing Spill

- G-1 Identify and evaluate recovery/removal options, including equipment options
- G-2 Determine if recovered product is hazardous or nonhazardous
- G-3 Determine if recovered product is exempt or non-exempt
- G-4 Identify storage for recovered product
- G-5 Transfer/transport recovered product
- G-6 Identify disposal/reuse options
- G-7 Maintain documentation

• Category H. Monitoring Wildlife Impact

- H-1 Know and follow federal, state, and local regulations
- H-2 Activate appropriate permits through Operations Manager
- H-3 Identify wildlife areas and verify wildlife in the areas
- H-4 Identify wildlife species
- H-5 Assess wildlife conditions
- H-6 Notify appropriate individuals: Haze, capture, or collect wildlife, as directed; Stabilize and release wildlife
- H-7 Maintain documentation

• Category I. Setting Up/Managing Staging Area(s)

- I-1 Identify resources needed
- I-2 Identify/determine staging site(s)
- I-3 Establish security
- I-4 Track personnel and equipment
- I-5 Demobilize personnel, equipment and supplies
- I-6 Maintain documentation

• Category J. Decontaminating Personnel and Equipment

- J-1 Implement the appropriate decontamination procedures
- J-2 Track personnel and equipment
- J-3 Evaluate effectiveness of decontamination
- J-4 Manage and reduce waste
- J-5 Properly dispose of waste material
- J-6 Maintain documentation

• Category K. Managing/Handling Hazardous Materials

- K-1 Ensure regulatory compliance
- K-2 Identify and categorize hazardous materials
- K-3 Inspect hazardous materials storage areas
- K-4 Collect and transport hazardous materials
- K-5 Properly label and package hazardous materials for storage, shipment or disposal
- K-6 Maintain documentation

• Category L. Conducting Site Remediation

- L-1 Assist in updating the site safety plan
- L-2 Set up site safety zones
- L-3 Physically modify the site safety zones as remediation progresses
- L-4 Monitor the site; perform on-site tests
- L-5 Set up/modify decontamination stations
- L-6 Take proper samples
- L-7 Set up and maintain remediation systems
- L-8 Maintain documentation

PANEL MEMBERS:

Jack Coffman, Laborer III, SERVS/TCC, Valdez, Alaska

C. Agneta Dahl, Chief, Port Operations Department, U.S. Coast Guard, Valdez, Alaska Harold Trygve Enger, Manager, Marine Spill Response, Foss Environmental Services, Seattle, WA Rich J. Helinski, Senior Specialist, Environmental Response, ARCO Alaska, Inc., Anchorage, AK Stanley W. Jepson, Technical Trainer, SERVS, Valdez, AK

Alan Rayner, Assistant Area Coordinator - Olympic Peninsula, Clean Sound Cooperative Inc., Port Angeles, WA

John D. Schreiber, Field Superintendent, CCI, Soblotna, AK

Geoff Snyder, Marine Response Specialist III, Clean Bay Incorporated, Concord, CA Vince Volpe, Environmental Technician, Alaska Clean Seas, Prudhoe Bay, AK

DACUM LOCATION:

Prince William Sound Community College, Valdez, AK

DACUM CO-FACILITATORS/RECORDERS:

Steven Fenton, Associate Director, Hazardous Materials Training and Research Institute (HMTRI), Bettendorf, IA

Cindy Lake, Instructional Designer, Advanced Technology Environmental Education Center (ATEEC), Bettendorf, IA

DACUM COORDINATOR:

Vince Kelly, Coordinator, Vocational Education & Training, Prince William Sound Community College, Valdez, AK

SPONSORS:

The Advanced Technology Environmental Education Center, which is funded by the National Science Foundation, comprises the Hazardous Materials Training and Research Institute (a partnership between the Eastern Iowa Community College District and Kirkwood Community College), the University of Northern Iowa, and the Partnership for Environmental Technology Education.
